

## How safe is it to come to my appointment at MMC?

- Our primary concern is the safety of our patients, visitors and staff.
- We are carefully abiding by the Center for Disease Control guidelines.
- Anyone who comes into the hospital is asked a series of COVID-19 screening questions before they enter.
- We have staff assigned to continuously monitor safety measures, including an in-house Infection Preventionist.
- MMC continues to maintain a well equipped supply of personal protection equipment so that our staff have the resources they need to stay protected.

## What are MMC staff doing to stay safe and healthy? *How do I know that they aren't sick/ won't get me sick?*

- Staff at MMC are required to wear protective equipment during any patient contact.
- Extra efforts are being made to sanitizing, cleaning, and disinfecting throughout our facility.
- Staff must take their temperature daily. They are staying home if they are feeling sick.

## Are there any extra safety precautions I need to take before my appointment or procedure?

- Before your appointment at MMC, continue to practice the safer at home order set in place by Governor Evers.
- Self isolation is recommended.
- Wash your hands often for at least 20 seconds.
- If you must go out, practice social distancing.
- If you are sick, stay home and call your provider.
- Wear a mask to your appointment. If you don't have one, we will give you one at the door.

## What about COVID-19 testing?

- If you are having an elective surgery at MMC, you will be tested for COVID-19.
- Anyone who needs a test will get one.
- Since the testing capacity is still limited at this time, we are conserving the test kits for our community.
- MMC staff are not automatically tested.
